Building Virtual Pentesting Labs for Advanced Penetration Testing Kevin Cardwell

Build intricate virtual architecture to practice any penetration testing technique virtually

About This Book

- Build and enhance your existing pentesting methods and skills
- Get a solid methodology and approach to testing
- Step-by-step tutorial helping you build complex virtual architecture

Who This Book Is For

If you are a penetration tester, security consultant, security test engineer, or analyst who wants to practice and perfect penetration testing skills by building virtual pentesting labs in varying industry scenarios, this is the book for you. This book is ideal if you want to build and enhance your existing pentesting methods and skills. Basic knowledge of network security features is expected along with web application testing experience.

What You Will Learn

- Build routers, firewalls, and web servers to hone your pentesting skills
- Deploy and then find the weaknesses in a firewall architecture
- Construct a layered architecture and perform a systematic process and methodology to use for conducting an external test
- Get introduced to several of the different security testing methodologies
- Design monitored environments and evade them
- Create complex architecture

- Bypass antivirus and other protection
- Practice methods of evasion against today's top defenses
- Leverage the client configuration

In Detail

A penetration test, also known as pentest, is a method of assessing computer and network security by replicating an attack on a computer system or network from the outside world and internal threats. With the increase of advanced hackers and threats to our virtual world, pentesting is an absolute necessity.

Building Virtual Pentesting Labs for Advanced Penetration Testing will teach you how to build your own labs and give you a proven process to test these labs; a process that is currently used in industry by global pentesting teams. You will also learn a systematic approach to professional security testing, building routers, firewalls, and web servers to hone your pentesting skills.

From reader reviews:

Dorothy Wild:

The ability that you get from Building Virtual Pentesting Labs for Advanced Penetration Testing is the more deep you looking the information that hide inside words the more you get thinking about reading it. It doesn't mean that this book is hard to be aware of but Building Virtual Pentesting Labs for Advanced Penetration Testing giving you enjoyment feeling of reading. The writer conveys their point in certain way that can be understood through anyone who read the idea because the author of this publication is well-known enough. That book also makes your current vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this kind of Building Virtual Pentesting Labs for Advanced Penetration Testing instantly.

Teddy Mendoza:

This Building Virtual Pentesting Labs for Advanced Penetration Testing is great publication for you because the content that is full of information for you who always deal with world and also have to make decision every minute. This specific book reveal it information accurately using great plan word or we can say no rambling sentences within it. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but tricky core information with wonderful delivering sentences. Having Building Virtual Pentesting Labs for Advanced Penetration Testing in your hand like finding the world in your arm, info in it is not ridiculous just one. We can say that no book that offer you world within ten or fifteen second right but this book already do that. So , this is good reading book. Heya Mr. and Mrs. hectic do you still doubt that will?

Carolina Jones:

That publication can make you to feel relax. This specific book Building Virtual Pentesting Labs for Advanced Penetration Testing was multi-colored and of course has pictures on the website. As we know that book Building Virtual Pentesting Labs for Advanced Penetration Testing has many kinds or genre. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you and try to like reading this.

Ramona Wrenn:

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many

ways to reach Chinese's country. Therefore , this Building Virtual Pentesting Labs for Advanced Penetration Testing can make you truly feel more interested to read.
