Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing Robert Faludi

Get ready to create distributed sensor systems and intelligent interactive devices using the ZigBee wireless networking protocol and Series 2 XBee radios. By the time you're halfway through this fast-paced, hands-on guide, you'll have built a series of useful projects, including a complete ZigBee wireless network that delivers remotely sensed data.

Radio networking is creating revolutions in volcano monitoring, performance art, clean energy, and consumer electronics. As you follow the examples in each chapter, you'll learn how to tackle inspiring projects of your own. This practical guide is ideal for inventors, hackers, crafters, students, hobbyists, and scientists.

- Investigate an assortment of practical and intriguing project ideas
- Prep your ZigBee toolbox with an extensive shopping list of parts and programs
- Create a simple, working ZigBee network with XBee radios in less than two hours -- for under \$100
- Use the Arduino open source electronics prototyping platform to build a series of increasingly complex projects
- Get familiar with XBee's API mode for creating sensor networks
- Build fully scalable sensing and actuation systems with inexpensive components
- Learn about power management, source routing, and other XBee technical nuances
- Make gateways that connect with neighboring networks, including the Internet

From reader reviews:

Anita Jones:

This Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing book is simply not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is actually information inside this publication incredible fresh, you will get information which is getting deeper you actually read a lot of information you will get. That Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing without we realize teach the one who reading through it become critical in contemplating and analyzing. Don't always be worry Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing can bring whenever you are and not make your carrier space or bookshelves' become full because you can have it inside your lovely laptop even cell phone. This Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing having good arrangement in word along with layout, so you will not experience uninterested in reading.

Lydia Baum:

People live in this new day of lifestyle always attempt to and must have the extra time or they will get great deal of stress from both day to day life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not only a robot. Then we consult again, what kind of activity do you possess when the spare time coming to a person of course your answer will unlimited right. Then ever try this one, reading guides. It can be your alternative in spending your spare time, the particular book you have read is usually Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing.

Nancy Chinn:

Are you kind of hectic person, only have 10 or even 15 minute in your morning to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because this time you only find publication that need more time to be go through. Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing can be your answer as it can be read by anyone who have those short spare time problems.

Francis Lopez:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the most effective book for you, science, comic, novel, or whatever by simply searching from it. It is referred to as of book Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing. Contain your knowledge by it. Without leaving the printed book, it may add your knowledge and make an individual happier to read. It is most significant that, you must aware about publication. It can bring you from one spot to other place.
