Introducing specific mutations into the Escherichia coli chromosome using linear transformation

Peter Thaler

Introducing specific mutations into the Escherichia coli chromosome using linear transformation Peter Thaler

Diploma Thesis from the year 2003 in the subject Biology - Micro- and Molecular Biology, grade: 1 (A), University of Innsbruck (Institute for Microbiology), 22 entries in the bibliography, language: English, abstract: In 1885 Theodor Escherich described the gram negative bacterium Escherichia coli (E. coli) (Escherich T., Rev.1989). The gram negative rod belongs to the family of the enterobacteriaceae. It is a natural inhabitant of the human and animal intestine. E. coli can also cause diseases like diarrhea, inflammation of the urinary tract or the gall bladder. Urinary tract infections (UTIs) are one of the most common reasons for antibiotic therapy worldwide (Burman and Olsson-Liljequist, 2001). People with UTIs suffer inflammation of the urinary tract, and frequently the kidneys. Two-thirds of patients with UTIs are women (Canbaz et al. 2002). This is related in part to the shortness of the urethra, which makes colonization of the bladder by bacteria more likely. The elderly and those who undergo genitourinary operations and catheterisation are also frequent sufferers of UTIs (Orenstein and Wong, 1999). The leading causative agent of UTIs is E. coli (60-80 %), usually originating from the patients own faecal flora, followed by Staphylococcus saprophyticus (10 %), Klebsiella sp., other Gram negative bacteria and enterococci (Burman and Olsson-Liljequist, 2001). The antibiotic class most frequently prescribed to treat UTIs in Western Europe and North America is the fluoroquinolones. Fluoroquinolones are synthetic antibiotics derived from nalidixic acid. Resistance to the synthetic fluoroquinolone antibiotics is increasing among the organisms that cause UTIs.

From reader reviews:

John Augustine:

In this 21st one hundred year, people become competitive in every way. By being competitive currently, people have to do something to make them survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Sure, by reading a publication your ability to survive boost then having chance to stand than other is high. In your case who want to start reading a new book, we give you this kind of Introducing specific mutations into the Escherichia coli chromosome using linear transformation book as beginner and daily reading e-book. Why, because this book is greater than just a book.

Willie Adams:

Information is provisions for anyone to get better life, information currently can get by anyone in everywhere. The information can be a know-how or any news even restricted. What people must be consider any time those information which is inside the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you have the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take Introducing specific mutations into the Escherichia coli chromosome using linear transformation as the daily resource information.

Martha Dixon:

Reading a e-book can be one of a lot of pastime that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new details. When you read a book you will get new information simply because book is one of many ways to share the information or maybe their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you may share your knowledge to other people. When you read this Introducing specific mutations into the Escherichia coli chromosome using linear transformation, you can tell your family, friends along with soon about yours reserve. Your knowledge can inspire the others, make them reading a book.

Ronald Sadowski:

People live in this new day of lifestyle always try and must have the free time or they will get lots of stress from both way of life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to anyone of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is actually Introducing specific mutations into the Escherichia coli chromosome using linear transformation.
