Communications, Radar and Electronic Warfare Adrian Graham

A practical guide to the principles of radio communications for both civilian and military applications

In this book, the author covers both the civilian and military uses of technology, focusing particularly on the applications of radio propagation and prediction. Divided into two parts, the author introduces the basic theory of radio prediction before providing a step-by-step explanation of how this theory can be translated into real-life applications. In addition, the book presents up-to-date systems and methods to illustrate how these applications work in practice. This includes systems working in the HF bands and SHF. Furthermore, the author examines the performance of these systems, and also the effects of noise, interference and deliberate jamming, as well as the performance of jamming, detection and intercept systems. Particular attention is paid to the problems caused by Radio Controlled Improvised Explosive Devices (RCIEDs).

Key Features:

- A practical handbook on the topic of radio communications and propagation
- Written by an expert in both the civilian and military applications of the technology
- Focuses on methods such as radio and radar jamming, and radio-controlled improvised explosive devices (IEDs)
- Contains problems and solutions to clarify key topics

From reader reviews:

Micheal Taylor:

The book Communications, Radar and Electronic Warfare will bring one to the new experience of reading any book. The author style to describe the idea is very unique. When you try to find new book to read, this book very appropriate to you. The book Communications, Radar and Electronic Warfare is much recommended to you you just read. You can also get the e-book from your official web site, so you can more easily to read the book.

Robin Curtin:

Reading can called imagination hangout, why? Because while you are reading a book specifically book entitled Communications, Radar and Electronic Warfare the mind will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely can be your mind friends. Imaging every single word written in a guide then become one web form conclusion and explanation that maybe you never get ahead of. The Communications, Radar and Electronic Warfare giving you another experience more than blown away your brain but also giving you useful facts for your better life on this era. So now let us demonstrate the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Deborah Young:

Beside that Communications, Radar and Electronic Warfare in your phone, it might give you a way to get more close to the new knowledge or details. The information and the knowledge you are going to got here is fresh in the oven so don't become worry if you feel like an aged people live in narrow small town. It is good thing to have Communications, Radar and Electronic Warfare because this book offers for your requirements readable information. Do you at times have book but you seldom get what it's exactly about. Oh come on, that will not happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss this? Find this book along with read it from right now!

Karen Schanz:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that examining is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Communications, Radar and Electronic Warfare can make you sense more interested to read.
