High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry) Jack M. Widholm, Toshiyuki Nagata, Y.P.S. Bajaj

Presenting the state of the art of tissue culture and in vitro propagation of vegetable and tuber crops, medicinal and aromatic plants, fibre and oilseed crops, and grasses, this book complements the previous two volumes on High-Tech and Micropropagation, which concentrated on special techniques (Vol.17) and trees and bushes of commercial value (Vol.18). The specific plants covered here include asparagus, lettuce, horse radish, cucumber, potato, cassava, sweet potato, artichoke, yams, cardamom, fennel, celery, thyme, leek, mentha, turmeric, lavender, agave, yucca, cotton, jute, sunflower, ryegrass, zoysiagrass, and various species of Aconitum, Artemisia, Camelia, Centaurium, Digitalis, Dioscorea, Glehnia, Levisticum, Parthenium, and Pinella. The book is of use to advanced students, teachers and research workers in the field of pharmacy, horticulture, plant breeding and plant biotechnology in general, and also to individuals interested in industrial micropropagation.

From reader reviews:

William Glover:

Inside other case, little persons like to read book High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry). You can choose the best book if you want reading a book. As long as we know about how is important some sort of book High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry). You can add expertise and of course you can around the world by a book. Absolutely right, mainly because from book you can learn everything! From your country right up until foreign or abroad you can be known. About simple matter until wonderful thing it is possible to know that. In this era, we are able to open a book as well as searching by internet system. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

Marivel Tye:

As people who live in the particular modest era should be change about what going on or details even knowledge to make these individuals keep up with the era and that is always change and make progress. Some of you maybe can update themselves by studying books. It is a good choice for you but the problems coming to you is you don't know what one you should start with. This High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry) is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

William Brown:

The particular book High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry) has a lot of knowledge on it. So when you read this book you can get a lot of advantage. The book was published by the very famous author. This articles author makes some research before write this book. This specific book very easy to read you can get the point easily after perusing this book.

Craig Rushing:

This High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry) is brand-new way for you who has curiosity to look for some information given it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or you who still having tiny amount of digest in reading this High-Tech and Micropropagation III: v. 3 (Biotechnology in Agriculture and Forestry) can be the light food for yourself because the information inside this kind of book is easy to get through anyone. These books build itself in the form which is reachable by anyone, that's why I mean in the e-book type. People who think that in book form make them feel drowsy even dizzy this reserve is the answer. So there isn't any in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the item! Just read this e-book variety for your better life along with knowledge.
