Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) George Varghese

In designing a network device, you make dozens of decisions that affect the speed with which it will perform—sometimes for better, but sometimes for worse. Network Algorithmics provides a complete, coherent methodology for maximizing speed while meeting your other design goals.

Author George Varghese begins by laying out the implementation bottlenecks that are most often encountered at four disparate levels of implementation: protocol, OS, hardware, and architecture. He then derives 15 solid principles—ranging from the commonly recognized to the groundbreaking—that are key to breaking these bottlenecks.

The rest of the book is devoted to a systematic application of these principles to bottlenecks found specifically in endnodes, interconnect devices, and specialty functions such as security and measurement that can be located anywhere along the network. This immensely practical, clearly presented information will benefit anyone involved with network implementation, as well as students who have made this work their goal.

FOR INSTRUCTORS: To obtain access to the solutions manual for this title simply register on our textbook website (textbooks.elsevier.com) and request access to the Computer Science subject area. Once approved (usually within one business day) you will be able to access all of the instructor-only materials through the "Instructor Manual" link on this book's academic web page at textbooks.elsevier.com.

- Addresses the bottlenecks found in all kinds of network devices, (data copying, control transfer, demultiplexing, timers, and more) and offers ways to break them.
- Presents techniques suitable specifically for endnodes, including Web servers.
- Presents techniques suitable specifically for interconnect devices, including routers, bridges, and gateways.
- Written as a practical guide for implementers but full of valuable insights for students, teachers, and researchers.
- Includes end-of-chapter summaries and exercises.

From reader reviews:

Jennifer Crowe:

This Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) are reliable for you who want to become a successful person, why. The main reason of this Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) can be one of many great books you must have will be giving you more than just simple studying food but feed a person with information that probably will shock your previous knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed kinds. Beside that this Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day action. So , let's have it and luxuriate in reading.

Daniel Rhoads:

Your reading sixth sense will not betray anyone, why because this Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) reserve written by well-known writer whose to say well how to make book which can be understand by anyone who read the book. Written in good manner for you, dripping every ideas and producing skill only for eliminate your own personal hunger then you still skepticism Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) as good book but not only by the cover but also by the content. This is one book that can break don't determine book by its protect, so do you still needing one more sixth sense to pick this specific!? Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.

Kim Deyoung:

In this period of time globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended for your requirements is Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) this e-book consist a lot of the information from the condition of this world now. That book was represented how do the world has grown up. The language styles that writer require to explain it is easy to understand. Often the writer made some research when he makes this book. That is why this book suited all of you.

Daryl Sanders:

Is it anyone who having spare time and then spend it whole day simply by watching television programs or

just laying on the bed? Do you need something new? This Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices (The Morgan Kaufmann Series in Networking) can be the answer, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
