The Ontology of Spacetime (Philosophy and Foundations of Physics)

Professor Dennis Dieks Ph.D. M.Sc.

The Ontology of Spacetime (Philosophy and Foundations of Physics) Professor Dennis Dieks Ph.D. M.Sc.

This book contains selected papers from the First International Conference on the Ontology of Spacetime. Its fourteen chapters address two main questions: first, what is the current status of the substantivalism/relationalism debate, and second, what about the prospects of presentism and becoming within present-day physics and its philosophy? The overall tenor of the four chapters of the book's first part is that the prospects of spacetime substantivalism are bleak, although different possible positions remain with respect to the ontological status of spacetime. Part II and Part III of the book are devoted to presentism, eternalism, and becoming, from two different perspectives. In the six chapters of Part II it is argued, in different ways, that relativity theory does not have essential consequences for these issues. It certainly is true that the structure of time is different, according to relativity theory, from the one in classical theory. But that does not mean that a decision is forced between presentism and eternalism, or that becoming has proved to be an impossible concept. It may even be asked whether presentism and eternalism really offer different ontological perspectives at all. The writers of the last four chapters, in Part III, disagree. They argue that relativity theory is incompatible with becoming and presentism. Several of them come up with proposals to go beyond relativity, in order to restore the prospects of presentism.

- Space and time in present-day physics and philosophy
- Introduction from scratch of the debates surrounding time
- Broad spectrum of approaches, coherently represented

From reader reviews:

Kenneth Salinas:

The knowledge that you get from The Ontology of Spacetime (Philosophy and Foundations of Physics) is the more deep you looking the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to recognise but The Ontology of Spacetime (Philosophy and Foundations of Physics) giving you buzz feeling of reading. The author conveys their point in specific way that can be understood by simply anyone who read the idea because the author of this e-book is well-known enough. This book also makes your own personal vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We propose you for having that The Ontology of Spacetime (Philosophy and Foundations of Physics) instantly.

Brandy Anderson:

A lot of people always spent their own free time to vacation as well as go to the outside with them household or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity this is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book you read you can spent the whole day to reading a book. The book The Ontology of Spacetime (Philosophy and Foundations of Physics) it is very good to read. There are a lot of those who recommended this book. These were enjoying reading this book. If you did not have enough space to create this book you can buy typically the e-book. You can m0ore very easily to read this book from a smart phone. The price is not too expensive but this book possesses high quality.

Donald White:

The book untitled The Ontology of Spacetime (Philosophy and Foundations of Physics) contain a lot of information on it. The writer explains the woman idea with easy method. The language is very easy to understand all the people, so do not worry, you can easy to read the item. The book was published by famous author. The author brings you in the new era of literary works. You can easily read this book because you can read more your smart phone, or model, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can start their official web-site in addition to order it. Have a nice study.

Barbara Hall:

You can spend your free time to study this book this guide. This The Ontology of Spacetime (Philosophy and Foundations of Physics) is simple to bring you can read it in the area, in the beach, train as well as soon. If you did not include much space to bring the actual printed book, you can buy often the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
