Digital Microscopy: 113 (Methods in Cell Biology)

Digital Microscopy: 113 (Methods in Cell Biology)

The previous edition of this book marked the shift in technology from video to digital camera use with microscope use in biological science. This new edition presents some of the optical fundamentals needed to provide a quality image to the digital camera. Specifically, it covers the fundamental geometric optics of finite- and infinity-corrected microscopes, develops the concepts of physical optics and Abbe's theory of image formation, presents the principles of Kohler illumination, and finally reviews the fundamentals of fluorescence and fluorescence microscopy. The second group of chapters deals with digital and video fundamentals: how digital and video cameras work, how to coordinate cameras with microscopes, how to deal with digital data, the fundamentals of image processing, and low light level cameras. The third group of chapters address some specialized areas of microscopy that allow sophisticated measurements of events in living cells that are below the optical limits of resolution.

* Expands coverage to include discussion of confocal microscopy not found in the previous edition

* Includes "traps and pitfalls" as well as laboratory exercises to help illustrate methods

From reader reviews:

Debra Jones:

Reading a book can be one of a lot of pastime that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new information. When you read a e-book you will get new information since book is one of several ways to share the information or even their idea. Second, examining a book will make a person more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the character types do it anything. Third, you may share your knowledge to others. When you read this Digital Microscopy: 113 (Methods in Cell Biology), you can tells your family, friends and soon about yours guide. Your knowledge can inspire the others, make them reading a guide.

Kelly Cohn:

Spent a free a chance to be fun activity to complete! A lot of people spent their leisure time with their family, or their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to test look for book, may be the publication untitled Digital Microscopy: 113 (Methods in Cell Biology) can be good book to read. May be it may be best activity to you.

Lupita Kirch:

People live in this new day of lifestyle always make an effort to and must have the free time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not a robot. Then we request again, what kind of activity are there when the spare time coming to anyone of course your answer will certainly unlimited right. Then ever try this one, reading guides. It can be your alternative inside spending your spare time, the book you have read is usually Digital Microscopy: 113 (Methods in Cell Biology).

Therese Webb:

Reading a book for being new life style in this season; every people loves to read a book. When you go through a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, and soon. The Digital Microscopy: 113 (Methods in Cell Biology) provide you with new experience in examining a book.
