Utilizing the teaching value of real-world case discussions, *Cancer Biology Review* presents the principles of cancer biology in a clear and memorable manner, allowing the clinician to relate the cases shown in the book to those seen in practice. Focusing on ten topics in cancer biology for which there have been major changes in fundamental understanding, the authors provide a concise overview of the principles of each topic, followed by presentation of clinical cases illuminating the topic and detailed discussions. Summaries and key teaching points are highlighted at the end of each chapter to facilitate quick recall and review. The chapter authors are established translational experts in the biology being discussed as well practicing master clinicians.

*Cancer Biology Review* is a useful tool for any oncology clinician in training or preparing for boards, and for the oncology practitioner preparing for recertification or who sees the need to be more fully conversant in the current science of the field as clinically applied.

### **Features of *Cancer Biology Review* include:**

- Presents principles of cancer biology through clinical translations and therapeutic perspective
- Clinical cases illustrate scientific principles as the clinician will observe them in practice
- Emphasis on scientific basis of current and emerging therapeutics
- Leading translational scientists/clinicians provide current, authoritative discussions
