The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) Robert Axelrod

Robert Axelrod is widely known for his groundbreaking work in game theory and complexity theory. He is a leader in applying computer modeling to social science problems. His book *The Evolution of Cooperation* has been hailed as a seminal contribution and has been translated into eight languages since its initial publication. The *Complexity of Cooperation* is a sequel to that landmark book. It collects seven essays, originally published in a broad range of journals, and adds an extensive new introduction to the collection, along with new prefaces to each essay and a useful new appendix of additional resources. Written in Axelrod's acclaimed, accessible style, this collection serves as an introductory text on complexity theory and computer modeling in the social sciences and as an overview of the current state of the art in the field.

The articles move beyond the basic paradigm of the Prisoner's Dilemma to study a rich set of issues, including how to cope with errors in perception or implementation, how norms emerge, and how new political actors and regions of shared culture can develop. They use the shared methodology of agent-based modeling, a powerful technique that specifies the rules of interaction between individuals and uses computer simulation to discover emergent properties of the social system. *The Complexity of Cooperation* is essential reading for all social scientists who are interested in issues of cooperation and complexity

From reader reviews:

Mark Wolf:

The book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) can give more knowledge and information about everything you want. Why must we leave the best thing like a book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity)? Several of you have a different opinion about book. But one aim that will book can give many data for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or details that you take for that, you could give for each other; it is possible to share all of these. Book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) has simple shape however you know: it has great and big function for you. You can seem the enormous world by open up and read a reserve. So it is very wonderful.

Jeanne Crank:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their free time with their family, or all their friends. Usually they performing activity like watching television, likely to beach, or picnic within the park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could be reading a book is usually option to fill your free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the book untitled The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) can be great book to read. May be it could be best activity to you.

Christopher Arredondo:

You may get this The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) by visit the bookstore or Mall. Only viewing or reviewing it may to be your solve problem if you get difficulties for ones knowledge. Kinds of this e-book are various. Not only through written or printed but can you enjoy this book through e-book. In the modern era such as now, you just looking because of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose suitable ways for you.

Jacob Smith:

Publication is one of source of expertise. We can add our expertise from it. Not only for students but native

or citizen want book to know the revise information of year to help year. As we know those books have many advantages. Beside many of us add our knowledge, can bring us to around the world. By the book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) we can have more advantage. Don't you to definitely be creative people? For being creative person must prefer to read a book. Just choose the best book that suited with your aim. Don't end up being doubt to change your life with that book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity). You can more attractive than now.
