Archaeology and Ancient History: Breaking Down the Boundaries

Archaeology and Ancient History: Breaking Down the Boundaries

Challenging both traditional and fashionable theories, this collection of pieces from an international range of contributors explores the separation of the human past into history, archaeology and their related sub-disciplines.

Each case study challenges the validity of this separation and asks how we can move to a more holistic approach in the study of the relationship between history and archaeology.

While the focus is on the ancient world, particularly Greece and Rome, the lessons learned in this book make it an essential addition to all studies of history and archaeology.
