Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science) Robert J Vanderbei

This Fourth Edition introduces the latest theory and applications in optimization. It emphasizes constrained optimization, beginning with a substantial treatment of linear programming and then proceeding to convex analysis, network flows, integer programming, quadratic programming, and convex optimization. Readers will discover a host of practical business applications as well as non-business applications.

Topics are clearly developed with many numerical examples worked out in detail. Specific examples and concrete algorithms precede more abstract topics. With its focus on solving practical problems, the book features free C programs to implement the major algorithms covered, including the two-phase simplex method, primal-dual simplex method, path-following interior-point method, and homogeneous self-dual methods. In addition, the author provides online JAVA applets that illustrate various pivot rules and variants of the simplex method, both for linear programming and for network flows. These C programs and JAVA tools can be found on the book's website. The website also includes new online instructional tools and exercises.

From reader reviews:

Darlene Trevino:

Now a day folks who Living in the era where everything reachable by connect with the internet and the resources within it can be true or not need people to be aware of each data they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Studying a book can help people out of this uncertainty Information mainly this Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science) book because this book offers you rich details and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you know.

Sharon McMichael:

Nowadays reading books be a little more than want or need but also become a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want send more knowledge just go with schooling books but if you want experience happy read one along with theme for entertaining for instance comic or novel. The Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science) is kind of publication which is giving the reader unpredictable experience.

Salina Rodriguez:

Reading a guide can be one of a lot of activity that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new details. When you read a publication you will get new information mainly because book is one of numerous ways to share the information or perhaps their idea. Second, looking at a book will make you actually more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the characters do it anything. Third, you may share your knowledge to some others. When you read this Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science), you are able to tells your family, friends as well as soon about yours book. Your knowledge can inspire the others, make them reading a e-book.

Tanya McGaha:

Book is one of source of knowledge. We can add our understanding from it. Not only for students but also native or citizen will need book to know the up-date information of year to year. As we know those guides have many advantages. Beside all of us add our knowledge, can bring us to around the world. With the book Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science) we can consider more advantage. Don't that you be creative people? Being creative person must like to read a book. Simply choose the best book that suitable with your aim. Don't always be

doubt to change your life at this book Linear Programming: Foundations and Extensions: 196 (International Series in Operations Research & Management Science). You can more desirable than now.
