Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series)

Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series)

A Co-Publication of Routledge for the National Council of Teachers of Mathematics (NCTM)

In recent years there has been increased interest in the nature and role of proof in mathematics education; with many mathematics educators advocating that proof should be a central part of the mathematics education of students at all grade levels. This important new collection provides that much-needed forum for mathematics educators to articulate a connected K-16 "story" of proof. Such a story includes understanding how the forms of proof, including the nature of argumentation and justification as well as what counts as proof, evolve chronologically and cognitively and how curricula and instruction can support the development of students' understanding of proof. Collectively these essays inform educators and researchers at different grade levels about the teaching and learning of proof at each level and, thus, help advance the design of further empirical and theoretical work in this area. By building and extending on existing research and by allowing a variety of voices from the field to be heard, *Teaching and Learning Proof Across the Grades* not only highlights the main ideas that have recently emerged on proof research, but also defines an agenda for future study.

From reader reviews:

Cassandra Martin:

Nowadays reading books become more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book that improve your knowledge and information. The details you get based on what kind of e-book you read, if you want send more knowledge just go with education books but if you want really feel happy read one together with theme for entertaining for instance comic or novel. The actual Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) is kind of publication which is giving the reader unforeseen experience.

Marcus Casale:

Reading a reserve can be one of a lot of activity that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new facts. When you read a guide you will get new information because book is one of several ways to share the information or even their idea. Second, examining a book will make a person more imaginative. When you studying a book especially fictional works book the author will bring someone to imagine the story how the figures do it anything. Third, you can share your knowledge to others. When you read this Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series), it is possible to tells your family, friends in addition to soon about yours book. Your knowledge can inspire others, make them reading a publication.

Hazel Makowski:

A lot of people always spent their particular free time to vacation or even go to the outside with them family or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity here is look different you can read any book. It is really fun to suit your needs. If you enjoy the book that you read you can spent the whole day to reading a reserve. The book Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series) it is very good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too expensive but this book provides high quality.

Wayne Joseph:

A lot of book has printed but it differs from the others. You can get it by web on social media. You can choose the top book for you, science, witty, novel, or whatever by simply searching from it. It is named of book Teaching and Learning Proof Across the Grades: A K-16 Perspective (Studies in Mathematical Thinking and Learning Series). You can contribute your knowledge by it. Without leaving behind the printed

book, it could add your knowledge and make a person happier to read. It is most important that, you must aware about publication. It can bring you from one spot to other place.
