The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics)

Stefano Atzeni, Jürgen Meyer-ter-Vehn

The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) Stefano Atzeni, Jürgen Meyer-ter-Vehn

This book is on inertial confinement fusion, an alternative way to produce electrical power from hydrogen fuel by using powerful lasers or particle beams. It involves the compression of tiny amounts (micrograms) of fuel to thousand times solid density and pressures otherwise existing only in the centre of stars. Thanks to advances in laser technology, it is now possible to produce such extreme states of matter in the laboratory. Recent developments have boosted laser intensities again with new possibilities for laser particle accelerators, laser nuclear physics, and fast ignition of fusion targets. This is a reference book for those working on beam plasma physics, be it in the context of fundamental research or applications to fusion energy or novel ultra-bright laser sources. The book combines quite different areas of physics: beam target interaction, dense plasmas, hydrodynamic implosion and instabilities, radiative energy transfer as well as fusion reactions. Particular attention is given to simple and useful modelling, including dimensional analysis and similarity solutions. Both authors have worked in this field for more than 20 years. They want to address in particular those teaching this topic to students and all those interested in understanding the technical basis.

From reader reviews:

Roxanne Pineda:

What do you think about book? It is just for students because they're still students or this for all people in the world, the particular best subject for that? Just you can be answered for that concern above. Every person has diverse personality and hobby per other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics). All type of book would you see on many options. You can look for the internet options or other social media.

Herman Deans:

People live in this new time of lifestyle always attempt to and must have the spare time or they will get lots of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, often the book you have read will be The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics).

Candice Sharkey:

Many people spending their moment by playing outside along with friends, fun activity along with family or just watching TV the whole day. You can have new activity to shell out your whole day by examining a book. Ugh, do you think reading a book can actually hard because you have to accept the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Mobile phone. Like The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) which is finding the e-book version. So , why not try out this book? Let's view.

Nathaniel Mitchell:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is published or printed or illustrated from each source in which filled update of news. On this modern era like today, many ways to get information are available for you. From media social like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the The Physics of Inertial Fusion: BeamPlasma Interaction, Hydrodynamics, Hot Dense Matter (International Series of Monographs on Physics) when you required it?
