Leafhopper Vectors and Plant Disease Agents

Leafhopper Vectors and Plant Disease Agents

Leafhopper Vectors and Plant Disease Agents is the second in a multivolume series on vectors, vector-borne disease agents, and plant disease spread. This text aims to collect findings in leafhopper vector research, to suggest promising frontiers for further research, and to call attention to possible practical applications of understanding of leafhopper-pathogen-plant interactions.

This book is organized into five parts. Opening chapters on the taxonomy, bionomics, and worldwide importance of leafhopper and planthopper vectors are appropriately relegated to Parts I and II. Part III focuses on vector-virus interactions of leafhopper-, planthopper-, and aphid-borne viruses and virus-induced, cytopathological changes in vectors. This part also explains the interactions of mycoplasma-like organisms (MLOs) and viruses in dually infected leafhoppers, planthoppers, and plants, as well as the transitory vector-virus interactions. The artificial and aseptic rearing of vectors, microinjection technique, vector tissue culture, and spiroplasmas and its vectors are all covered in Part IV. Part V contains chapters on specific leafhopper-borne viruses and MLOs, leafhopper and planthopper vector control, leafhopper-borne pathogens of corn-stunting diseases, Western X disease, and leafhopper-borne xylem-restricted pathogens.

This text will be valuable for students, teachers, and researchers of vector-pathogen-plant relationships. Its in-depth coverage of leafhoppers and planthoppers as vectors makes this book ideally suited as a supplemental text in graduate entomology and plant pathology courses on insect transmission of plant disease agents.

From reader reviews:

Gary Bloomfield:

Now a day folks who Living in the era where everything reachable by match the internet and the resources in it can be true or not call for people to be aware of each information they get. How people have to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Reading a book can help folks out of this uncertainty Information particularly this Leafhopper Vectors and Plant Disease Agents book as this book offers you rich details and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it you may already know.

Kenneth Quisenberry:

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is Leafhopper Vectors and Plant Disease Agents this guide consist a lot of the information with the condition of this world now. This specific book was represented how can the world has grown up. The language styles that writer use for explain it is easy to understand. The writer made some analysis when he makes this book. This is why this book appropriate all of you.

Donna Valdez:

Don't be worry in case you are afraid that this book may filled the space in your house, you might have it in e-book way, more simple and reachable. This specific Leafhopper Vectors and Plant Disease Agents can give you a lot of friends because by you investigating this one book you have factor that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great individuals. So , why hesitate? Let me have Leafhopper Vectors and Plant Disease Agents.

John Moreno:

That e-book can make you to feel relax. This particular book Leafhopper Vectors and Plant Disease Agents was bright colored and of course has pictures around. As we know that book Leafhopper Vectors and Plant Disease Agents has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading which.
