Stellar Interiors - Physical Principles, Structure, and Evolution

Carl J. Hansen, Steven D Kawaler, Virginia Trimble

Stellar Interiors - Physical Principles, Structure, and Evolution Carl J. Hansen, Steven D Kawaler, Virginia Trimble

The first edition of this text appeared in 1994. Shortly after the third printing, our editor suggested that we attempt a second edition because new developments in stellar structure and evolution had made our original work outdated. We (the original authors, CJH and SDK) reluctantly agreed but with reservations due to the effort involved. Our initial reluctance disappeared when we were able to convince (cajole, twist the arm of, etc.) our new coauthor, colleague Virginia Trimble to join us. (Welcome Virginia!) We (i.e., all three of us) hope that you agree that the present edition is a great improvement compared to the 1994 effort. Our objectives in this edition are the same ones we set forth in 1994: What you will find is a text designed for our target audience: the typical senior undergraduate or beginning graduate student in astronomy or astrophysics who wishes an overview of stellar structure and evolution with just enough detail to understand the general picture. She or he can go on from there to more specialized texts or directly to the research literature depending on talent and interests. To this end, this text presents the basic physical principles without chasing all the (interesting!) details. For those of you familiar with the first edition, you will find that some things have not been changed substantially ($F = ma$ is still $F = ma$), while others definitely have. For example, Chapter 2 has been completely rewritten.

From reader reviews:

Vincent Overly:

Within other case, little persons like to read book Stellar Interiors - Physical Principles, Structure, and Evolution. You can choose the best book if you want reading a book. As long as we know about how is important a new book Stellar Interiors - Physical Principles, Structure, and Evolution. You can add information and of course you can around the world by just a book. Absolutely right, since from book you can know everything! From your country till foreign or abroad you will be known. About simple thing until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You can use it when you feel uninterested to go to the library. Let's learn.

Ann Morgan:

Now a day people who Living in the era just where everything reachable by talk with the internet and the resources included can be true or not call for people to be aware of each facts they get. How a lot more to be smart in acquiring any information nowadays? Of course the solution is reading a book. Studying a book can help persons out of this uncertainty Information especially this Stellar Interiors - Physical Principles, Structure, and Evolution book because book offers you rich facts and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you probably know this.

Ariane Swanson:

This Stellar Interiors - Physical Principles, Structure, and Evolution are generally reliable for you who want to be a successful person, why. The reason of this Stellar Interiors - Physical Principles, Structure, and Evolution can be one of many great books you must have is usually giving you more than just simple reading through food but feed you with information that might be will shock your before knowledge. This book will be handy, you can bring it all over the place and whenever your conditions at e-book and printed types. Beside that this Stellar Interiors - Physical Principles, Structure, and Evolution giving you an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day exercise. So , let's have it and enjoy reading.

Helen Massey:

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their own friends. Usually they undertaking activity like watching television, about to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Might be reading a book could be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the publication untitled Stellar Interiors - Physical Principles, Structure, and Evolution can be excellent book to read. May be it can be best activity to you.
